

# Epidemiology Update Novel Coronavirus (2019-nCoV)

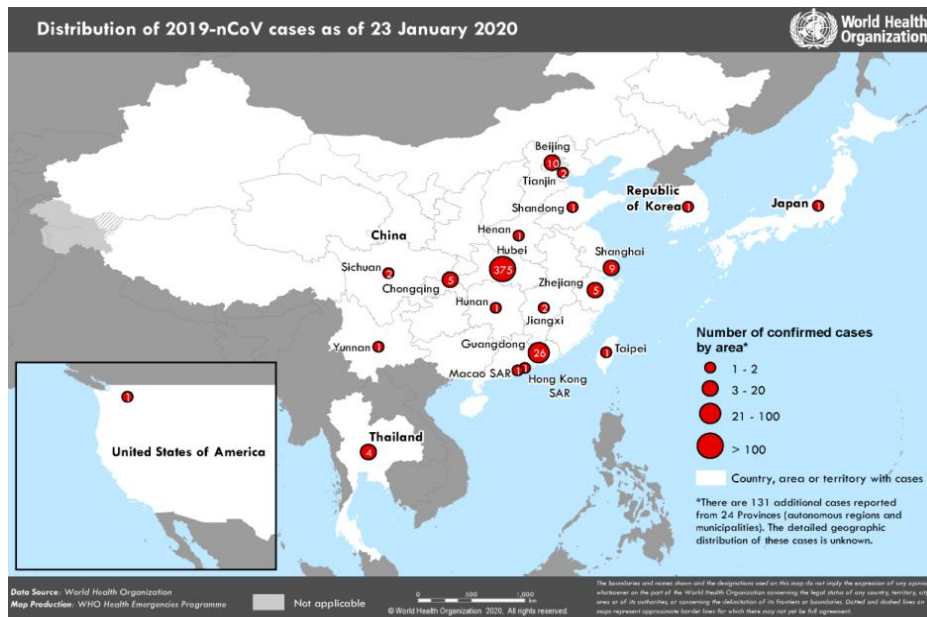

## INFORMATION NOTE No. 1

AS OF 6:00 PM (AST) ON JANUARY 24, 2020

**The World Health Organisation (WHO) has placed the risk of the nCoV event to be very high in China, high at the regional level and moderate at the global level.**

### KEY HIGHLIGHTS:

- On 21 January 2020, The World Health Organization (WHO) declared the outbreak of the Novel Coronavirus. Currently WHO IHR Emergency Committee is meeting to discuss possibility of declaring the outbreak A Public Health Emergency of International Concern
- A PHEIC is declared if an extraordinary event poses a public health threat to other nations through the spread of disease and requires a more robust coordinated international response.
- The risk of transmission to the Caribbean is LOW
- WHO, CDC have assessed the risk level low but this may change in coming days based on international spread.
