Updates from Impacted CDEMA Participating State

SAINT LUCIA

The following was provided by the National Emergency Management Organisation (NEMO), Saint Lucia as at 14 November, 2022:

- On November 6th St Lucia was affected by the trough system
- A record high 88.8 mm of rainfall was recorded, a very unusual occurrence at this time. An estimated 3 – 4 times recorded for the same period in previous years. The country was already saturated from the rains they experienced two weeks prior
- The flooding was localized to the north of the island and 10 communities were impacted
- The response has been upgraded to a Level 2 due to the numbers of persons affected, extent of the damage and cost of recovery
- The NEOC is still partially activated
- Residents in the low-lying areas were majorly impacted
- Whilst there were some landslides, the major damage was attributed to flooding
- Due to the moving flood waters, parked vehicles were swept away
- One School has suffered major damage with an estimated cost of EC\$780k in damages. The entire ground floor of the school was damaged
- Preliminary assessments indicate infrastructural damage at EC\$854,180.00
- Eight (8) communities suffered major road damage
- Three (3) hotels suffered major damage in the process of assessing the cost of the damages
- Counsellors have been deployed and engaged at the Wellness Centres in the communities
- 1003 households have been assessed and food packages, water, mattresses, WASH items being distributed
- Assessments continue
- A needs list has been compiled and a call for assistance to the Diaspora has been made
- The preference for cash donations remains as the items can be sourced on island
- The NEOC will be the focal point for the coordination of any support
