National Earthquake Information Center
(NEIC) of the USGS

General Description

- On Friday, January 20, 2023, around 7: 45 AM AST, the National Earthquake Information Center (NEIC) of the USGS recorded an earthquake of magnitude 6.2 on the Richter scale. The earthquake occurred 40 km WSW of Pointe-Noire, Guadeloupe at a depth of 166.372 km.
- To date and time, seven (7) CDEMA Participating States (PSs) reported feeling the earthquake.
- To date, there have been no reports of any situations, damages or concerns to the CDEMA PSs.
- To date and time, no Tsunami messages were generated and there is no cause for concern to the CDEMA PSs.

The Regional Response Mechanism (RRM)

- The Regional Response Mechanism (RRM) is on Alert
- The CDEMA Regional Coordination Centre (RCC) is monitoring the situation
- The CDEMA CU maintains contact with the Eastern Sub-Region Focal Point (led by Antigua and Barbuda) and with Dominica and Saint Lucia
- One (1) CDEMA Situation Report has been disseminated to date
- The CDEMA CU recognizes the multi-hazard environment in which this earthquake impact has occurred and will continue to monitor the situation and stands ready to provide support to PSS where requested
